

Cotton Seed Meal

Cotton Seed meal is a high protein by-product from the extraction of oil from whole cottonseed. There are two different processing methods used to extract the oil from the cottonseed, and they differ in the amount of oil (fat) they leave in the meal. The amount of oil left in the meal affects its energy value.

It's produced from Decorticated cottonseed cake, after series of preparatory physical processes followed by multi stage extraction of Oil, under hygienically controlled conditions.

Product Specification

Protein	38-40% Max
